

PCS Carpet Cleaning Process

EVIDENCE BASED CLEANING
IT'S ALL ABOUT THE PROCESS

PCS Carpet Cleaner

An all natural way of cleaning carpets, can be effectively used with most carpet cleaning techniques, designed and certified to maximize indoor air quality and for use around chemically sensitive populations.

A Sustainable Solution to Carpet Cleaning

For use as a pre spray solution:

- Dilute 6 ounces per US gallon of water (180 mL per 3.78 L).
- Apply with pump up sprayer or Hydroforce sprayer.
Allow to dwell agitate carpet nap and rinse with carpet extractor.

For use in carpet extractor:

- Dilute 1 ounce per US gallon of water (30 mL per 3.78 L).
- Take care not to over wet carpet.

For use as a carpet spotter and for low moisture carpet cleaning:

- Dilute 2 ounces per US gallon of water (60 mL per 3.78 L).

Always test carpet for colour fastness. Best results are achieved when carpets are thoroughly dry vacuumed before carpet cleaning and soon after carpets are completely dry.

Ingredients: Water, Sodium Carbonate, Sodium Citrate, Sodium Bicarbonate and Xanthan gum.
