

Laundered PCS Hygienic Microfibre Cloths

A

B

- A. PCS Hygienic Microfibre cloth used to wipe surfaces dry after application of PCS 1000 Plus with single use wipe. Cloth was rinsed in warm water. Water appears murky.
- B. Cloth rinsed in warm water. Water is clear.

This illustration provides visual evidence PCS Apply and Dry process removes organic soils which could include bacteria, viruses, mold, spores and biofilms that are left on surfaces when using single use wipes.
