

## New Four Fold Wipes

**Sodium Hypochlorite and Hypochlorous Acid compatible.  
Wipes can be dispensed from bucket wet or dry.**

### When used to dispense dry wipes.

- Remove lid and thread first wipe from center of roll and thread through the lid and secure lid to the bucket.
- PCS recommends taking dry wiper and fold to have four 6-inch x 5-inch sides.

### Daily cleaning with PCS Four Fold Wipes

- Add 10 mls of PCS Hypochlorous Water to wipe for daily cleaning of most surfaces.
- 1st Use to replace reusable cleaning cloths including microfiber cloths.
- 2nd No need to add detergent for daily cleaning.
- 3rd Use to prevent the potential transfer of soils from reusing cleaning cloths.
- 4th Cost of using PCS Four Fold Wipes can be less than reprocessing cleaning cloths and mixing and adding detergent.

### To Oxidize and Disinfect from frequently touched surfaces.

- Add 10 mls of PCS 1000 Plus Oxidizing Disinfectant Cleaner to wipe.
- Wipe surfaces using all four sides to reduce cross-contamination.
- When using a wiper to disinfect frequently touched surfaces, make sure to follow label instructions for disinfecting surfaces.

### When used to dispense pre-moistened wipes.

1. Place workplace label on pail in the assigned area. PCS recommends use with PCS Health Canada approved products.
2. Remove lid and thread wipe from center of roll through the lid.
3. Add 946 mls of selected product slowly over wipes in the bucket then secure the lid to pail.
4. Allow the liquid to saturate the wipes for a few minutes before use.

### Always follow label instructions of selected disinfectant cleaner.

#### Recommended instruction for use.

1. Remove the wiper slowly from the bucket.
2. Take a damp wiper and fold to have 4 6 inch x 5 inch sides.
3. Wipe frequently touched surfaces to Clean, Oxidize and Remove organic soils.
4. Remember to flip wipe to clean side to reduce potential cross-contamination.
5. Always follow label instructions for use when disinfecting frequently touched surfaces.
