Organic Acid Disinfectants by PCS

At PCS, we highly recommend PCS MicroClean, a powerful, concentrated all-organic cleaner that dilutes with 256 parts water. Designed for cleaning frequently touched surfaces, it works synergistically with microfiber cleaning systems and is effective at reducing microbial contamination to safe levels.

We invite you to explore not only the first page of our product details but also the additional articles on the second page. These resources provide valuable insights for anyone looking to minimize the impact of detergents and disinfectants in their cleaning routine.

Additionally, we offer PCS 250, a mild, low-concentration disinfectant with a near-neutral pH. Ideal for use after MicroClean's pre-cleaning step, it adds an extra layer of effective disinfection. PCS 250 is perfect for a wide range of commercial and institutional settings, including the cleaning and wiping of non-critical care medical equipment.

Discover a cleaner, safer, and more sustainable way to maintain your environment with PCS organic acid disinfectants.

Replace Bleach with PCS Disinfecting Solutions

Looking for a safer, more efficient alternative to bleach-based cleaning and disinfecting products? PCS offers a range of powerful disinfectants that deliver fast, effective results without the harsh chemicals.

PCS 1000 Plus: A one-minute disinfectant, available in both ready-to-use and cost-effective concentrated diluted solutions. This versatile oxidizing cleaner, hospital-grade disinfectant, and broad-spectrum virucide is the perfect replacement for high-concentration sodium hypochlorite (5000 ppm bleach) products. It's also mild enough to replace US hydrogen peroxide-based products, making it ideal for healthcare settings.

PCS Buffered pH Bleach Oxidizing Disinfectant Cleaner: Kills *C. difficile* in just 5 minutes, while providing hospital-grade disinfection, broad-spectrum virucidal action, and fungicidal properties in only 1 minute. This product is perfect for replacing sporicidal deep cleans, offering a faster, more efficient alternative to traditional bleach solutions.

PCS 5000 Oxidizing Sporocidal Disinfectant: Kills *C. difficile* and is designed to replace existing 5000 ppm ready-to-use bleach disinfectants, offering a safer, more effective option for high-level disinfecting.

All of our products are proudly manufactured in Peterborough, Ontario, ensuring high-quality, reliable solutions for your cleaning and disinfecting needs. Buy Canadian Firrst - Make the switch to PCS today.
